- Gateway between monitoring system and cloud via Wi-Fi.
- Future-proof thanks to over-the-air updates.
- Cost-effective alternative to the Smappee Genius.
- Ensures secured data storage from components.
- 1-day data storage in case of network outage.

The Wi-Fi Connect is, similar to the Genius, the gateway between the Power Box and the cloud (Smappee or other), ensuring secure data storage from different components. Data is transferred via Wi-Fi. In the event of a network outage, data will be stored for one day. It only transfers data and does not offer smart control or load balancing functionalities. The Wi-Fi Connect is a cost-efficient way to add intelligence to the Smappee Infinity setup.
